

# Israel: Medical Cannabis Inhaler Trialled For Over A Year At Haifa's Rambam Hospital Will Now Be Distributed

The Times of Israel reports that..... *in a world first, Israel's Teva Pharmaceutical Industries Ltd. and Tel Aviv-based Syqe Medical said they signed a distribution and cooperation agreement to market medical cannabis in an inhaler.*

The report goes on to say

Under the agreement, Teva will be the exclusive marketer and distributor in Israel of an inhaler developed by Syqe Medical for the delivery of medical cannabis. The accord marks the first time that a major global pharma company has agreed to market a medical cannabis product, according to Syqe.

The Syqe inhaler has been used for more than a year at Haifa's Rambam Hospital with the approval of the Health Ministry. This makes it the first hospital in the world to prescribe cannabis as a standard medical treatment.
