

Uruguay: Govt Announces Launch of National Registry

3 May 2017

The Cannifornian reported yesterday

Authorities announced the registry's launch Tuesday.

Uruguay legalized the cultivation and sale of marijuana in 2013, becoming the first nation in the world to do so.

The law allows the growing of pot by licensed individuals, the formation of growers and users clubs and the sale by pharmacies. Registered users will be able to buy 40 grams a month. Only Uruguayan citizens and legal residents over the age of 18 can register.
